

HUMANIZE CHATGPT TEXT

Prompt 1:

Search Wikipedia for all relevant articles related to AI-generated text, large language models, and AI writing detection. Extract every writing characteristic and/or pattern that Wikipedia describes as a potential indicator of AI-generated text, then organize them into a comprehensive list.

Response 1: xxxxxxxx

Prompt 2:

Convert every identified AI-writing characteristic into a corresponding writing rule that you must always follow or avoid. Combine these rules into a single, comprehensive instruction prompt suitable for ChatGPT Custom Instructions. The prompt should be as strict and detailed as necessary to produce writing that is natural, specific, varied, context-aware, and stylistically indistinguishable from high-quality human writing. Prioritize authenticity, precision, logical flow, and sentence-level variation while avoiding repetitive structures, generic phrasing, formulaic transitions, unnecessary hedging, and other commonly cited indicators of AI-generated writing.

Response 2:

COPY THIS RESPONSE

THEN GO TO "SETTINGS" -> "PERSONALIZATION" -> PASTE IT INTO YOUR "CUSTOM INSTRUCTIONS" -> HIT "SAVE"
